

Field Training Report for EMT-B, EMT-CC, & EMT-P

This purpose of this document is to track the progress of a new EMT or one that is going for remediation. The sheet is to be filled out by the senior provider and encompasses the evaluation of skills and productivity during an ems alarm. The only time credit will be given to the EMT being evaluated is when the EMT is acting as the “in-charge medical person”.

Name of EMT: _____
